

We're looking for you!

Electronics Technician

50% – 100% – to start immediately or by agreement

ReseaTech is a start-up spun out of Bern University of Applied Sciences that has been developing and manufacturing high-speed flow sensors for 11 years. Every day, we come up with new ideas and continue to optimise and develop our devices and production processes. All nine of our staff members are highly motivated and work together on electronics, mechanics and software to make our sensors even better!

Your responsibilities:

- You will assist in production by assembling electronic components, carrying out assembly work and programming.
- You will source electronic components and assemblies.
- You will set up calibration stations alongside our engineers.
- You will analyse and repair electronic sensors and document the results.

Your profile:

- Completed vocational apprenticeship as an electronics technician or equivalent training
- Reliable, conscientious and organised approach to work
- Interest in technology and a willingness to learn new things
- Flexible and a team player

We offer:

- Modern equipment and software
- Flexible working hours
- A positive and motivating working atmosphere
- Flat hierarchy
- Good coffee

Unser Standort

ReseaTech GmbH
Kirchbergstrasse 190
